

Maanvi Shadakshari

AI/ML Engineer | Cloud Infrastructure | GenAI / RAG

☎ +91 7208014200 | ✉ shadaksharimaanvi@gmail.com | 🔗 [LinkedIn](#) | 🌐 [Portfolio](#) | 🐙 [GitHub](#) | 🏆 [Behance](#)

Education

Fr. Conceicao Rodrigues Institute of Technology (FCRIT)

Vashi, Mumbai

B.Tech in Computer Engineering | Honours: Artificial Intelligence & Machine Learning

Aug 2023 – Present

- CGPA: 9.09 / 10 | Relevant Coursework: Data Mining & Business Intelligence, Big Data Analytics

Technical Skills

Cloud & Infrastructure: AWS, GCP, Docker, Kubernetes, Firebase, REST APIs, CI/CD

ML, AI & GenAI: RAG, LLMs, NLP, Transformers, CNNs, LSTMs, FAISS, PyTorch, TensorFlow, Hugging Face

MLOps & Modeling: XGBoost, Transfer Learning, YOLO, OpenCV, Grad-CAM, SMOTE, Scikit-learn

Backend: Python, FastAPI, Flask, Node.js, Express.js, ASP.NET, Supabase

Databases & Tools: MySQL, MongoDB, Postgres, SQL, Git / GitHub, OAuth 2.0, RBAC, Figma

Frontend: React.js, Next.js, React Native, Flutter, JavaScript

Other: C++, C#, RoboFlow, Arduino IDE

Work Experience/ Internships

Tusk Oral Care (Creatures of Habit Pvt. Ltd.) | Product Tech Fellow — Tusk Kids Project

Apr 2026 – Present

- Selected as one of 2 Product Tech Fellows for Tusk Kids — delivered the Kids landing page and led initial development of the Tusk mobile app, collaborating directly with founders on architecture and delivery.

SVIK IT Solutions and Consultancy | Software Engineer Intern

Jun 2025 – Apr 2026

- Developed a full-stack Project Management System (live client product) with modular architecture and Role-Based Access Control; designed the relational database schema from scratch while iterating with design and SQL teams.

Fr. Conceicao Rodrigues Institute of Technology | Machine Learning Intern

Oct 2025 – Feb 2026

- Built an ML pipeline for predictive fault detection on ball bearing defects from digital twin sensor data — K-Means clustering for labeling and an ensemble of Random Forest, XGBoost resolved with SMOTE, achieving 95% accuracy and 98.7% ROC-AUC. [\[GitHub\]](#)

Altimetrik | Data Engineering Intern

Jun 2025 – Jul 2025

- Built an end-to-end RAG pipeline (chunking, HuggingFace embeddings, FAISS retrieval) and contributed to a production enterprise LLM chatbot, supporting architecture and design. [\[GitHub\]](#)

Indian Institute of Technology, Bombay | Student Intern

Jun 2025 – Jul 2025

- Built the Python GUI for a Video Amplification & Fault Diagnosis tool, integrating with an underlying MATLAB signal processing algorithm.

ZarvisGenix | Mobile App Development Intern

Jun 2024 – Jul 2024

- Built a Flutter mobile app end-to-end; integrated scan-and-pay via Plaid Sandbox, reducing transaction time by 30%.

Projects

Production RAG Pipeline | RAG, FastAPI, Qdrant, MinIO, Docker, Microservices

[GitHub](#)

[Architecture](#)

- Built a RAG assistant for internal engineering knowledge as staged system-design upgrades: service-separated ingestion/query APIs, Qdrant for vector search, and MinIO for durable object storage — with a roadmap through async ingestion, hybrid search, and RAGAS-based evaluation.

AI-Powered Sales Forecasting Dashboard | LSTM, XGBoost, TensorFlow, FastAPI, Next.js, Recharts

[GitHub](#)

- Designed an LSTM-XGBoost ensemble for 30-day demand forecasting (RMSE: 488) using 30+ engineered features, and implemented a lead-time-aware safety stock model served via FastAPI with a Next.js dashboard.

Skin Disease Classifier | PyTorch, DenseNet121, Transfer Learning, Grad-CAM, Flask

[GitHub](#)

- Benchmarked MobileNet, EfficientNet, and DenseNet121 across 22 dermatological conditions, resolving class imbalance with Weighted Random Samplers and deploying a Flask app with Grad-CAM overlays for interpretability.

Freelance Work

Kode & Co. | Freelance Project Consultant | 🌐 kodeandco.online

Apr 2025 – Present

- Closed 4+ client contracts (incl. CIBA Mumbai); replaced a client's third-party booking app with a fully custom booking system, owning full delivery end-to-end.

Achievements & Certifications

TECHNOVA 2025 | Xavier Institute of Technology — 1st Place, App Development

Jan 2025

- Built Roots — a community social app connecting users via contacts, location, and family graphs; won against national-level competition.

- Certifications: Deep Learning Specialization — DeepLearning.AI/Coursera, 2026 ([link](#)) | SQL (Intermediate) — HackerRank, 2026 ([link](#)) | IoT & Cloud Computing — AWS Academy

Agnel Robotics Club & AI/DL Club, FCRIT | Technical Team Member (ROBOCON 2026); Jr. Technical Coordinator Jun 2024 – Present

- Building YOLO + OpenCV object detection pipelines and programming microcontrollers via Arduino IDE for ROBOCON; organised Webrush (100+ participants) and built the official HackQuinox website.
